Design of bank cards

Our company has more than 10 years experience in the design of plastic card payment systems Visa, Master Card and so forth.

Design for bank cards - specific and combined process, which requires a knowledge and experience of the specification process of production and operation of a credit card as well as being claims payment systems to accommodate the elements and use the recommended color palette.

Print design

As our studio is developing a design for printed products of a different direction and purpose. Whether it's business cards, posters, brochures or magazines, product packaging, branding vehicle or other machinery. Our designers and developers have years of experience in the design and package designs.

Webdesign

Our main objective - is to create a web site with the original design, which will not just business card of your company, but also an important source of information and tools to improve marketing effectiveness.

FIRST QUALITY PRICE ITS NOT INDEX.
